Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 September 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Van der Gracht et al. (US 5,546,198).

Regarding claims 1, 2, 5, 6 and 7, Van der Gracht discloses a frame member (1 of Fig. 1) a holographic viewing device (see Fig. 1) in which a computer-generated hologram (2 or 3 of Fig. 1) constructed as a transmission Fourier transform (line 22 of Col. 3) hologram is fitted in a frame member, the hologram including a peripheral site which does not contain at least one of a phase information and an amplitude information (i.e. the hologram must be either a phase hologram or an amplitude hologram: it can not be both at the same time).

Regarding claims 4 and 9, Van der Gracht discloses the hologram being in the form of a rectangular matrix (see Fig. 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 5, 8 and 9, rejected under 35 U.S.C. 103(a) as being unpatentable over Van der Gracht et al.

Gracht discloses the computer-generated hologram being a multilevel phase distribution (line 23 to line 24 of Col. 5). The reference is not explicit on the number of levels. However, it is well known in the art to use four-level or more phase holograms.

It would have been obvious, at the time the invention was made to a person having ordinary skill in the art to provide the hologram with a phase distribution multivalued to four or more levels so as to achieve proper brightness/sharpness of the reconstructed image.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

The examiner notes that the newly added limitation reciting the hologram "*including a peripheral site which does not contain at least one of a phase information and an amplitude information*" is always satisfied since the hologram is either a phase hologram or an amplitude hologram (see claims 6 and 7).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened

Art Unit: 2872

statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
